Rx for Paperwork Overload

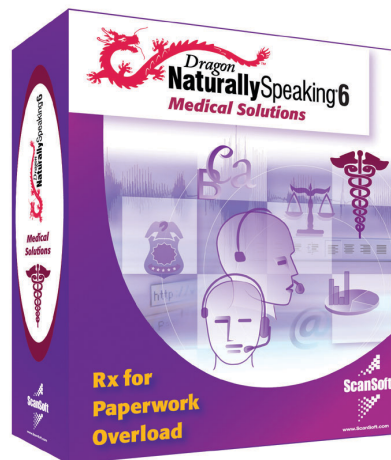

ScanSoft® Dragon NaturallySpeaking® Medical Solutions speech recognition software is a powerful productivity tool that enables medical professionals to work faster and more efficiently. Speak, and your words appear on screen and in electronic medical records, patient notes, and referral letters – virtually everywhere you can type.

Dictate letters, reports, and other documents; enter data; fill-in forms; send e-mail; and work on the Web – all by voice! Perform complex tasks on your computer with a spoken word or phrase, customize your vocabulary and commands to match your workflow, listen to incoming e-mail and documents read aloud, and much more.

Integrated with Microsoft® Office, Corel® WordPerfect® and Lotus Notes®, Dragon NaturallySpeaking® software works with virtually all Windows®-based applications.

Create your own documents on the spot or send your recorded dictation to be transcribed elsewhere. Dictate directly into a PC or any ScanSoft-certified handheld recorder for personal or third-party transcription.

Key Benefits:

- Reduces or eliminates transcription processing time and costs.
- Speeds up routine tasks on the PC by enabling you to create patient notes, dictate into electronic medical records, fax referral letters, and more – all by voice.
- Increases productivity when away from the office.
- Promotes prompt, standardized reporting and documentation procedures.
- Helps address Americans with Disabilities Act (ADA) and Section 508 requirements.
- Protects users from developing Repetitive Strain Injury (RSI) and helps employees with RSI return to work.

Product Features

ACCURATELY TURN VOICE INTO TEXT

Dictate continuously and naturally at up to 160 words per minute. Dragon NaturallySpeaking® speech recognition software has won over 140 major awards worldwide¹ for accuracy and ease of use.

INTEGRATED WITH MICROSOFT® OFFICE, COREL® WORDPERFECT®, AND LOTUS NOTES®

Use with virtually any Microsoft® Windows®-based application. You can even speech-enable your own applications.

COMPREHENSIVE VOCABULARY

Dragon NaturallySpeaking® Medical Solutions comes with a vocabulary of more than 250,000 standard and business terms, as well as specialty vocabularies for radiology, cardiology, and general surgery/operative notes, and a comprehensive general medicine vocabulary containing medication names, medical procedures, diagnoses, diseases, and more. It's easy to add new terms and create or import custom vocabularies for different specialties or interests.

PERFORM COMPLEX TASKS ON YOUR COMPUTER WITH A SPOKEN WORD OR PHRASE

Develop custom voice commands (macros) to create documents, insert boilerplate text, launch applications, fill-in forms, or perform complex tasks with a spoken word or phrase. For example, a "Text and Graphics" command can insert your name, title, and signature, or other text and bitmaps into your document. An "Advanced Scripting" command, which uses Microsoft®

VBA-compatible scripting language, can automate complex tasks or speech-enable applications.

Dictate WHEN YOU ARE AWAY FROM THE OFFICE

Dictate into any ScanSoft-certified² handheld recorder while you are on the road and you—or a transcriptionist—can use Dragon NaturallySpeaking® software to transcribe your documents later.

SAVE YOUR DICTATION FOR OUTSIDE TRANSCRIPTION

Dictate into Dragon NaturallySpeaking® software, save a recording of your dictation with your document, then send your file elsewhere to be corrected (works in Microsoft® Word, Corel® WordPerfect®, and DragonPad).

LISTEN TO YOUR E-MAIL AND OTHER DOCUMENTS READ ALOUD

The award-winning RealSpeak™ is text-to-speech technology that reads your documents and e-mail back to you in a human-sounding voice—a useful tool when you are editing or writing e-mail on the run.

WORK ON THE WEB BY VOICE

Search the Web, access information, and navigate Web pages by simply speaking URLs and links.

¹ See www.ScanSoft.com/NaturallySpeaking/awards/ for a complete list.

² See www.ScanSoft.com/NaturallySpeaking/support/compatibility/ for a list of compatible recorders.

SYSTEM REQUIREMENTS:

- Intel® Pentium® II / 400 MHz processor (or equivalent AMD processor)*
- 128 MB RAM*
- 300 MB free hard disk space
- Microsoft® Windows® XP, Millennium, 2000, 98, 95C, or Windows NT® 4.0 (with SP-6 or greater)
- Creative® Labs Sound Blaster®16 or equivalent sound card supporting 16-bit recording
- Microsoft® Internet Explorer 5 or higher (free download available at www.microsoft.com)
- CD-ROM drive: Required for installation
